

ANNOUNCEMENT
International Symposium

**CENTRAL NEURAL
PRODUCTION OF PERIODIC
RESPIRATORY MOVEMENTS**

April 14 – 18, 1982
Chicago, Illinois

The primary objective of this four day intensive workshop is to define and focus on the important questions concerning the mechanisms underlying normal and pathological respiratory pattern generation in mammals. Internationally recognized authorities on neural generation of respiratory pattern are scheduled to participate. Attendance will be limited to 80 scientists.
